View from Northbound Pedestrian Shade Canopy

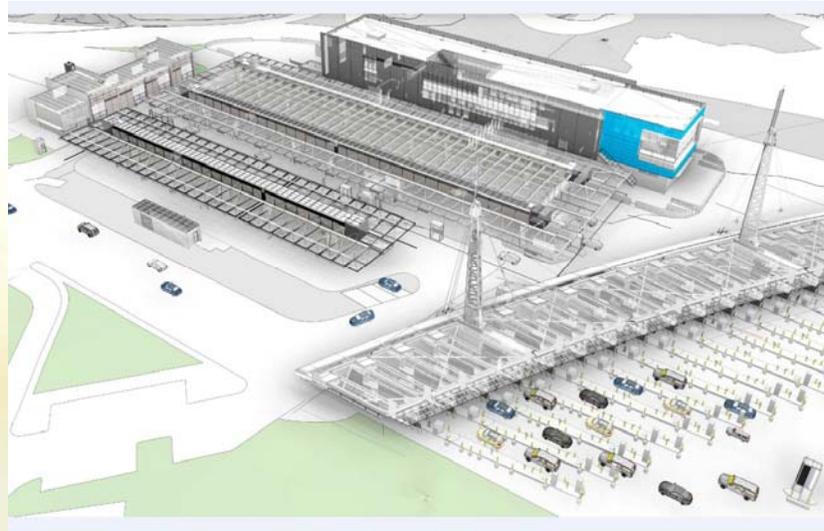

An architectural rendering showing a perspective view of a northbound pedestrian shade canopy. The canopy is a long, covered walkway with a white floor and a grey, perforated metal wall on the right side. Several silhouetted figures of people are walking along the path. In the background, there are modern buildings and a clear sky. The rendering is presented in a clean, minimalist style with a light grey background.

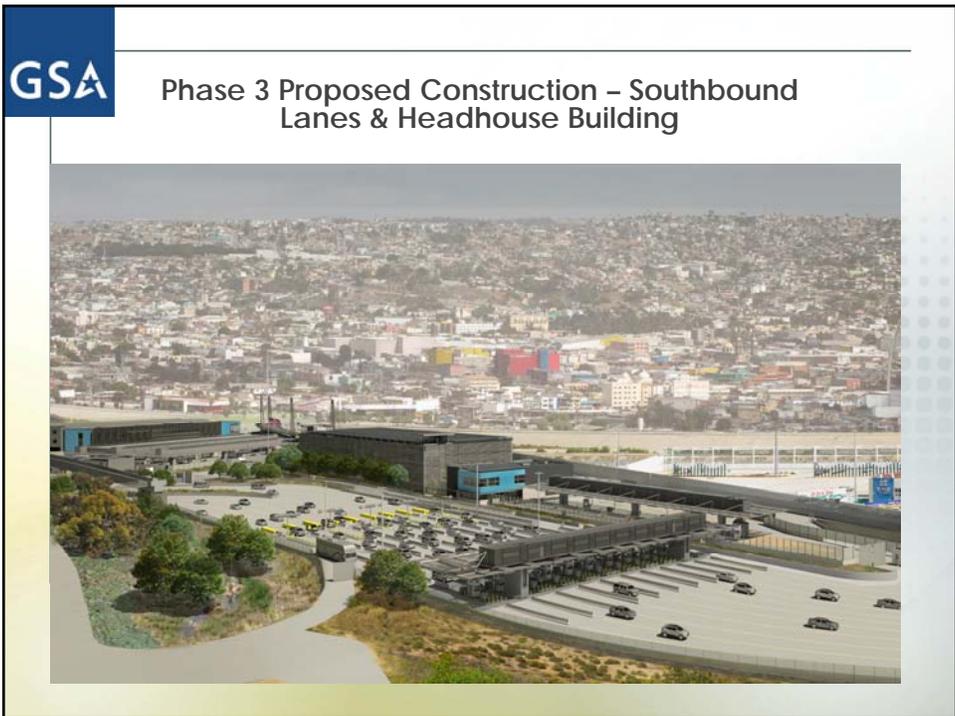

Phase 2 Proposed Construction – Approach to Main Pedestrian Building from Mexico

Phase 3 Proposed Construction – Additional Primary Lanes / Secondary Inspection

Start of Phase 3

Phase 3 Completed
