GeoSearch

GeoSearch provides consultants with accurate and complete regulatory and historical information to help assess and manage environmental risk. To that end, we harvest information from a variety of sources, cross-reference that information, and then compile and deliver the results in simple, clear reports. Products include environmental database reports, historic and current aerial photography, historical fire insurance maps, city directory research, oil, gas, and water well reports, and more. We hand-verify our reports to ensure accuracy. GeoSearch is a woman-owned DBE. <https://geo-search.com/>
